

CORGRIP* NG/NI
FEEDING TUBE RETENTION SYSTEM

INTENSIVE NEEDS. PRECISION CARE.

AVANOS

TUBE DISPLACEMENT

Tube displacement has been reported with a prevalence of up to **63%**¹

Tube displacement can lead to:²

Increased risk of aspiration

Interruptions in nutritional support

Skin breakdown

Radiographic exposure through verification of tube reinsertion

| **Early and efficient** feeding is important for critically ill patients⁴

| Failure to meet target calorific intake is associated with **high mortality rates** in critically ill patients^{5,6}

| Malnutrition is also associated with:

Increased
need for care⁷

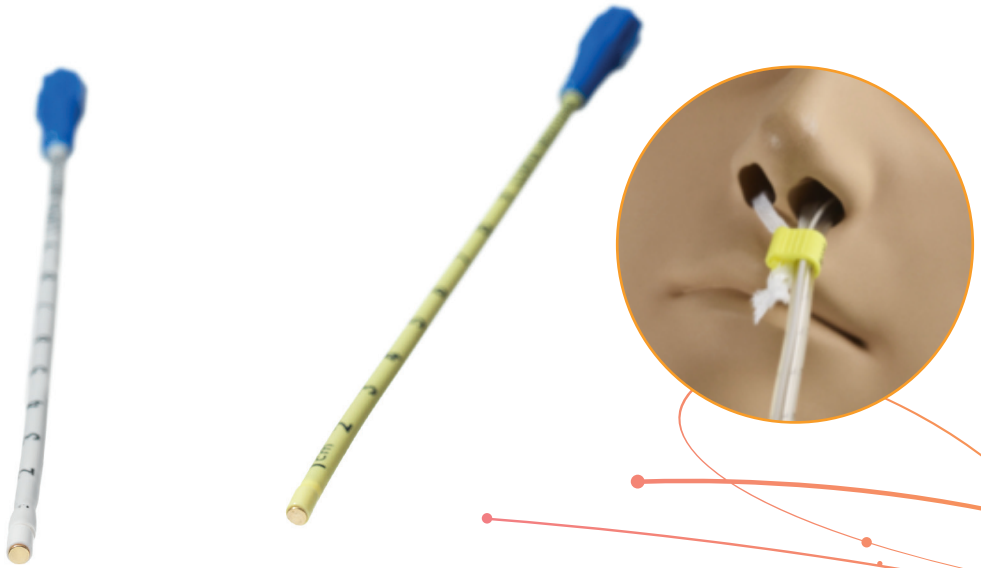

Longer
hospital stays^{7,8}

Higher rates
of readmission⁹

CORGRIP* NG/NI FEEDING TUBE RETENTION SYSTEM

PRODUCT FEATURES

- Unique deployment - no dragging of tape around vomer bone
- Unique Slot Slide Lock (SSL) securement clip
- Each catheter has numeric cm markings
- Range of sizes 8 Fr - 18 Fr
- Biocompatible, long lasting polyester umbilical tape
- Supplied with water soluble lubricant
- Colour coded clips for Fr size
- Single patient use
- Use for up to 4 weeks
- Supplied with spare clip and opening device
